

UNITED SOILS

Since its inception, Tiny Seedlings has had the great pleasure of growing with the wonderful families of our Town of Stouffville which it resides within.

We have entertained, educated and inspired over the past two years through the many events, performers and educators, in addition to posting family recipes and activities periodically to keep our amazing members engaged.

This summer will be a season of inspiration! United Soils Management has been tirelessly working behind the scenes to create an innovative landscape which will house a safe environment in which we can continue enabling our kids to be inspired through safe play, by learning and growing, through every facet Tiny Seedlings has taken pride in until now.

Excitement builds, as we will have our very own outdoor venue for our TS events, a learning garden in which our members can take an interactive part in, a safe outdoor play zone where families can participate in, outdoor sports fields and tracks, a natural outdoor space to watch various performances and so much more - seasonally tailored of course!

Without giving too much away, seeing as we have to give credit where credit is due, nature itself will take centre stage to this project. Naturally providing shade to sunny areas, comfort and safety should inclement weather arise, misting stations to refresh in scorching sunny days and enforcing the concept of recycling, which will be integral to this project wherein itself will be a huge educational component of this project.

Stay tuned for more updates as construction progresses.

There's a famous saying;

"If you build it, they will come". The TS Safe Play Open Air Arena awaits your arrival 2017.

Best Regards,

Shana Daniel
Director, Tiny Seedlings
